- Industry Leading Technical Support
- One is only as good as the other

Bob B — Boston, MA

Heavy Duty Truck Aligners

"I can't say enough how happy I am with my mobile truck system and wheel balancer. They both have work well and I haven't had any issues in over 2500 alignments. I must say I am very happy with RAV equipment but more importantly the outstanding customer service I received from your staff at RAVAmerica."

Technical Call Center

Equipment Calibration

**Wesley — Ashdown Arkansas
SmartAligner**

"I am a second generation tire dealer and we have recently upgraded our alignment to the new RAVAmerica Smart Aligner from RAVAmerica. The new system is fantastic and even allows us to do alignments off our two post lifts. It is fast and efficient and as a result our alignment productivity has really improved."

Pat — Pueblo, Colorado

Heavy Duty Truck Aligners

"We have used the RAV HD Alignment and Tire Changing equipment for the past 10 years or so. The customer support is really great and all issues are resolved quickly. When they tell you that they will have no problems supporting you....no matter your geographic location.....you can believe them. The equipment is great but the support is just as good."
