

Fender Paint Stand

FPS-5100

FEATURES

Folds up for easy storage

Unfolds and ready to use in seconds

Completely adjustable for several different fender designs

No pins or clamps required (all competitors have pins and clamps) this allows the painter to spray the fender and arm with no shadowing. This will also improve quality because the paint and clear thickness is the same (no shadowing due to no pins or clamps) so no flaking or chipping in the future.

Very sturdy with one or two fenders on it

Several shops use it as a paint stand for many other items such as mirrors, trim parts, bumpers and even doors.

Many shops with the need of several have purchased a couple to test and all of them have contacted us shortly after and bought the balance of what they needed.

Ongoing repeat customers

Priced below most in the industry
