

Trailer Door Attachment

The Lift King Trailer Door Attachment comes with everything needed to quickly connect to the Main Component allowing one technician to remove or install trailer doors without the need of additional technicians, forklifts, or other unsafe practices.

The lower mounting brackets adjust from side to side and are designed to mount under the trailer door. The upper mounting brackets are designed to channel each side of the trailer door approximately three feet below the top of the door and are adjustable to best accommodate thick or thin doors, providing a firm grip.

This application increases labor productivity and mitigates the risk of technician injuries. This is the safest way to remove or install trailer doors of all sizes; large or small.

SKU: LK5100

Fifth Wheel Rotisserie Stand

The Lift King Fifth Wheel Rotisserie Stand is the perfect solution for technicians when inspecting, rebuilding, or repainting fifth wheel plates, both light and heavy duty.

It is designed with a 360-degree rotation feature, and the ability to securely lock into the desired position. The Lift King Fifth Wheel Rotisserie Stand comes with a durable powder coat finish, takes up minimal floor space, and comes with swivel and brake casters. Like all Lift King products, it is built much heavier duty for longevity. Built in the USA.

SKU: LK5400

Deluxe Paint Stand

The Lift King Deluxe Paint Stand is designed as a universal paint stand for use in and out of the paint booth. It is built much heavier than most paint stands on the market and has great stability and durability.

The height is adjustable from 5' to 7'. The stand comes with eight panel hooks that slide from side to side, are telescopic, and can be flipped over or turned on an angle for the best hooking point. The center bar can be detached by removing two snap pins when hanging large panels.

It has four swivel brake casters for easy moving and secure positioning.

This is a great universal paint stand for trim parts, hoods, doors, fenders.

SKU: LK5570P

Heavy Duty Parts Cart

The Heavy Duty Parts Cart is built to accommodate more weight and have a longer life expectancy.

It has four parts hooks, two rear mounted bumper racks, and a rear panel mount designed to secure larger panels such as hoods, doors, decklids, tailgates, fenders, and more.

KEY FEATURES:

- Accommodate more weight
- Longer life expectancy
- 4 shelf management system
- Remove shelves easily
- Lockable 45" x 24" mesh shelves
- Easily move around the shop
- Secure with brake
